

PiezoMotor launches new driver unit: PMD90

Hannover, Germany, 21/04/2008

Uppsala-based micro-motor producer PiezoMotor Uppsala AB launches their new driver today. The **PMD90 driver unit** will allow clients to control and monitor speed, waveforms and accuracy of our motors directly on their own PC. The new driver will work together with standard and custom built motors based on the proprietary Piezo LEGS technology. The driver can be run open or closed loop. This new product launch will speed up product evaluation processes and application development for PiezoMotor's clients.

PiezoMotor's CEO Peo Lithell said: "We have developed this driver to enable our clients to easily and cost-effectively evaluate and appreciate the precision and strength of our motors."

Notes for Editors

Swedish based PiezoMotor has over 10 years' experience within the piezoelectric micro motor industry and has grown steadily from its formation in 1997. PiezoMotor's experienced staff members make an unprecedented know-how of piezo ceramics available to PiezoMotor's clients. This together with the innovative patented technology has secured current projects and volume orders, and will guarantee future success and competitive position. Furthermore, PiezoMotor's in-house manufacturing for multilayer Piezo ceramic motor elements, guarantees 1) quick and precise adaptation to customers varying product needs 2) low cost and 3) high efficiency.

PiezoMotor is partner and supplier of piezo motors and piezo motor technology and systems to many leading international companies.
