

## Success at HANNOVER MESSE 2006

UPPSALA, SWEDEN, May 9, 2006

**PiezoMotor AB, a world leading, game-changing provider of new micro motor technologies, today announced that once again, it experienced great interest at the annual industry exhibition HANNOVER MESSE. Having displayed the new PiezoWave™ motor for the first time on this exhibition, the PiezoMotor AB representatives came back home exhausted, but boosted with confidence.**

"We had a great exhibition and our booth was packed with people during the whole trade show", says Peo Sollerud, Vice President Marketing of PiezoMotor AB.

"Coming back home, we had loads of new high quality prospects and a lot of purchase orders for both Piezo LEGS® and PiezoWave™ motors. Furthermore, it was very stimulating to meet up with existing customers expressing so much positiveness about our products and talking about new applications and future market opportunities. There is no doubt that we have developed the right motor technologies with the right properties regarding miniaturization, precision and price. The overall interest proves that many really need our products", Mr. Sollerud continues.

This was the fourth time that PiezoMotor AB attended the HANNOVER MESSE and the company is planning to continue participating at leading trade shows around the world.

"I would like to take this opportunity to express a big thank you to everyone that visited us at the HANNOVER MESSE. There were so many nice and professional people representing fantastic companies coming talking to us and we look very much forward to further developing our relationship with all of you", Mr. Sollerud concludes.

### **About PiezoMotor AB**

PiezoMotor AB is dedicated to delivering the best and most cost competitive micro motors for volume applications on the market. Founded in 1997, PiezoMotor AB is developing, manufacturing and marketing several types of micro motors based on piezo technology. A number of technological platforms have been developed and successfully patented.

PiezoMotor AB markets the nano-precision Piezo LEGS® motors and the extremely small PiezoWave™ motors designed for massvolume applications such as handheld devices, digital household electrical appliances, medical technology devices and the automotive industry, just to mention a few.

The company has its own in-house manufacturing facility and is currently a supplier of motion solutions and partner to many leading multinational companies. Our customers are key players within consumer electronics, medical technology, factory automation, positioning equipment etc. The customer base is growing quickly.

The last few years PiezoMotor AB has successfully closed several financing rounds, strengthening the owner base with leading private equity investors and securing funding for capitalizing on the enormous market potential for small and smart micro motors.
