

PiezoMotor AB achieves certification to the coveted ISO 9001 quality standard

UPPSALA, SWEDEN, March 19, 2007

Uppsala-based micro-motor developer PiezoMotor AB has successfully achieved registration to the internationally recognised internal quality management standard ISO 9001:2000 (ISO 9000).

This independent assessment was conducted by SEMKO Certification AB, Sweden's leading certification body and demonstrates PiezoMotor AB's commitment to customer service and quality. PiezoMotor AB has now earned the right to display the coveted 'Quality Shield' and ISO 9000 logo to demonstrate its conformity to the standard.

ISO 9001:2000 was introduced in December 2000 and is recognised worldwide. It requires organisations to demonstrate that they have a quality management system to ensure consistency and continuous improvement; leading to higher levels of performance and customer satisfaction.

PiezoMotor AB's CEO Peo Lithell said: "We are particularly pleased to have achieved ISO 9000 certification as it underlines our commitment to our customers and our focus on quality. Not many customers get to see their suppliers' 'back-office' activities. This recognition demonstrates that we provide a quality solution from quotation to delivery."

PiezoMotor AB has over 10 years' experience within the piezoelectric micromotor industry and has grown steadily from its formation in 1997.

Notes for Editors

PiezoMotor AB has an unprecedented know-how around piezo ceramics available through its knowledgeable staff members. This together with the innovative technique has secured current projects and volume orders, and will guarantee future success and competitive position. Furthermore, PiezoMotor's in-house manufacturing for multilayer Piezo ceramic motor elements, guarantees 1) quick and precise adaptation to varying product needs and 2) low cost and efficiency.

The design of the motor elements enables mass-production of motors & elements in standard machines and proven production systems, an advantage over other piezomotor manufacturers and electric motor manufacturers. This has also led to a recent partnership & development programme with market-leading multinational Minebea.
